DETAILED ACTION

Claim Rejections - 35 USC § 102

 The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- Claims 1-6, 8, 11 and 13-17 are rejected under 35 U.S.C. 102(b) as being anticipated by US 3.627.176 to Sailors.

Sailors shows an automatic actuator for an aerosol container as seen in Fig. 3, having solenoid valve means 48 enclosed in a metallic cover 42, a metallic hood 58 secured with releasable fasteners 62, a metallic base 50, a power source 72, a spray nozzle and an aerosol connector elements 26 and 34. The metallic elements in the device of Sailors intensify the magnetic field where required, see column 3, lines 23-28.

In reference to claims 4 and 5, see Fig. 4 and column 4, lines 4-65.

Claim Rejections - 35 USC § 103

- The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all
 obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- Claims 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 3.627.176 to Sailors in view of US 5.417.258 to Privas.

Art Unit: 3754

Sailors shows all claimed features as discussed above except for a hooked portion for securing the hood to the base. Privas shows a valve cover with a hook 107 and a second part 106 with indentation; both parts lock and cooperate with respect to each other to secure the cover to the container. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to modify the device of Sailors to include a hook on the cover and indentation on the container to facilitate and simplify securing the cover to the container as taught by Privas.

Response to Arguments

5. Applicant's arguments filed June 15, 2010 have been fully considered but they are not persuasive. In response to applicant's argument that the references fail to show a solenoid coil enclosed by a cover, it is noted that this feature is not recited in the rejected claim(s). The claims required a magnetic inducing cover enclosing the valve means not the solenoid coil, placing the cover outside the magnetic field generated by the solenoid has no effect on the valve armature.

Conclusion

 THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Application/Control Number: 10/516,326

Art Unit: 3754

however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melvin A. Cartagena whose telephone number is (571) 272-4924. The examiner can normally be reached on M-TH (8:30AM to 7:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin P. Shaver can be reached on (571) 272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
